"""
    I am a self taught Javascript developer with 3 years of experience
creating web experiences. An MVC fanatic with REST and MEAN stack
expertise, I feel as comfortable creating and styling user
experiences as I do optimizing back end processes. I have production
experience with cutting edge FRP frameworks and tooling including
Angular 2, RXJS, and the Redux/Flux pattern. I am self motivated,
excited, and able to learn new technologies.

Selected Work Experience

```
[        " PM Toolbelt ",        " Full Stack Developer ",        " February 2016 - Present "        ]
```

" Worked on all aspects of a data intensive MEAN application within the context of a small startup ",
" Helped solidify process and work flow as our team of 2 developers grew into an 8 person shop. ",
" Refactored UI controllers into web components to improve event flow ",
" Maintained our older Cordova/Angular 1 application, migrated this application to Angular2/Ionic ",
" Improved synchronization between our application and our Quickbooks and Rent Manager integrations ",
" Styled and restyled major portions of the application using SASS and Material Design. ",
" Built Angular 2/ GraphQL / RxJs / Redux Prototypes for the next version of our application ",
" As one of only two developers who did not recently graduate from a coding bootcamp, I regularly took initiative to improve our teams skills by hosting 'lunch and learn' talks on topics such as asynchronicity, web components, and the power of composition "
